

Der Zimbelstern

The Zimbelstern for Creative Church Music

Der Zimbelstern is not your ordinary zimbelstern. Unlike most zimbelsterns, Der Zimbelstern offers a truly random-like bell sound, coming from high-quality tuned hand bell castings, with speed, volume and delay that you can control.

FEATURES AND SPECIFICATIONS

Adjustable speed - from slow to fast and infinitely in between to create a variety of effects to complement the music.

Adjustable volume - can be faded up from no volume at all, to soft, and gradually all the way up to very loud. This feature makes Der Zimbelstern useful in a variety of applications, ranging from the softest registrations to full organ in large rooms.

Adjustable delay - set the start time from up to seven seconds to instantaneously. The "countdown" begins when the zimbelstern is activated, and stops instantly when triggered.

Can be installed with new organs, rebuilds or existing organs

Bell pitches - C7, D7, F7, G7, A7 with no tonal center and no tri-tones.

Extended random sounding pattern - no short, repetitive sequence as some circular driven units can produce.

Special strikers - for clearer, brighter sound than with normal clappers.

Can utilize existing or new on/off controls

Reliable solid-state circuitry

Five-year Manufacturer's Warranty
